DETAILED ACTION

1. Applicant's election with traverse of species b) a product consisting essentially of polycrystalline chip with the chips being metal, metal alloy and intermetallic alloy, subspecies 1) in the reply filed on April 11, 2005 is acknowledged. The traversal is on the ground(s) that the subspecies share a common utility and a substantially structural feature disclosed as being essential to that utility. This is not found persuasive because the subspecies 1) metal, metal alloy and intermetallic are chemically different from ceramic material and that they are patentable distinct.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 3, 7-12, 15, 17 to 25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 11, 2004.

Claim Rejections - 35 USC § 102
